(54) **A ballistic and/or blast protection material and a structure protected by such a material**

(57) A ballistic and/or blast protection material comprises at least first and second ballistic composite panels (12a, 12b, 12a', 12b') and disposed between each pair of adjacent ballistic composite panels a respective core of a blast damping material (14, 14'). The ballistic composite panels preferably each consist of filaments of glass fiber, aramide, polyethylene or another high strength fiber said filaments either being disposed generally parallel to one another in layers in a matrix of a thermoplastic or a thermosetting plastic with the filaments of one layer crossing with the filaments in an adjacent layer, or with the filaments forming a woven fabric and a plurality of layers of said fabric being combined in a matrix of thermoplastic or thermosetting plastic.

Said ballistic panels (12a, 12a', 12b, 12b') can be bolted together by bolts (20, 22).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 09 00 7614

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
