(54) **Window-frame**

(57) A frame 1 is composed of a separate inner part 3 and a separate outer part 5. The inner part 3 is provided with two sides in view 7 and 9, which when the frame is assembled in an opening 11 in a wall 13, see figure 2, extend parallel to the inside and outside 15 and 17 of the wall. The outer part 5 is provided with a further surface in view 19, which after assembling the frame in an open-

ing in a wall is found on the outside 17 of the wall. The outer part 5 is detachably clicked onto adapter elements 31 in the inner part 3.

The chance of damage is virtually excluded by first attaching the inner part 3 during the construction and after completion of the assembly connecting the outer part 5 with the inner part.
