(54) **Supporting rest structures for toilets**

(57) A supporting rest structure for use with a toilet, the toilet comprising an outer pedestal cover and an inner pedestal chamber, wherein a void exists between the outer pedestal cover and the inner pedestal chamber, the supporting rest structure comprising a framework and at least one arm, the framework comprising a wall or floor fixing means which is connected to at least one arm support means, the at least one arm being releasably connected to the at least one arm support means and being pivotally movable from a first in-use position to a second out-of-use position, wherein in use the framework is situated inside the void between the outer pedestal cover and the inner pedestal chamber, and the at least one arm support means provides a load bearing support for both the at least one opposing arm and the outer pedestal cover.
