(54) **Guide rail assembly**

(57) Guide rail assembly comprising at least two rails (1,2) arranged along each other guiding a first structure relative to a second structure e.g. a wire basket and a cabinet, respectively, a first rail (1) being connected to the first structure, a second rail (2) being connected to the second structure; further comprising coupling means for coupling the rails to each other, said coupling means

being comprised of at least one opening in said first rail adapted to receive a stud (4) and formed as a cutout (3) in an upper or lower edge of said rail, wherein said cutout (3) is designed with an entrance area (5) and a locking area (6), such that by locking the stud (4) in the locking area of the cutout (3) a removable structure, in a mounted position, cannot unintentionally be released from an opposite structure.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 09 17 2077

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
