(54) **Device for conveying and removing glass waste in a machine for filling vials**

(57) Device for conveying and removing glass waste, of the type which is associable to a sealing station (18) of glass vials (1) in a machine (12) for filling the vials (1), operating in a chamber (A) in which there is a controlled atmosphere. The glass waste are unloaded by gripping means (6), provided in the sealing station (18), in a hopper (15) located laterally of said sealing station (18) and conveyed, by means of conveyor organs (27), to a collection container (16) of such waste, which is positioned in a different environment (B) from the controlled-atmosphere one.
