(54) **Air conditioner**

(57) Disclosed herein is an air conditioner having an improved configuration to control an air current via leftward or rightward rotation of a front body that defines a front surface of the air conditioner. The air conditioner includes a back body (70), and a front body (100) rotatably coupled to a front surface of the back body. The front body (100) includes a front cover (30), a front panel (10) coupled to a front surface of the front cover, a lower cover (90) defining a bottom of the front body, and side covers (45,46) defining opposite exterior lateral sides of the front body.
