(54) Outwardly opening window assembly

(57) The outwardly opening window assembly comprises four window sash profile members each comprising an outer element, a flange which extends at least partially opposite a peripheral edge of the window pane and means for attaching mounting hardware to the outer element, a thermally resistive element which is connected to said flange of said outer element, and an inner element which is connected to said thermally resistive element. The window assembly further comprises a

re-enforcement fitting which is fastened to the outer element of one of the profile members and which extends in a direction towards the inside of the window assembly such that at least a portion of said fitting is located between at least a portion of the inner element which is connected to said thermally resistive element and a portion of a window frame. The re-enforcement fitting is in supporting contact with a portion of a locking mechanism.

The present search report has been drawn up for all claims					
Place of search	Date of completion of the search	Examiner			
The Hague	10 June 2016	Jülich, Saskia			
CATEGORY OF CITED DOCUMENTS					
X : particularly relevant if taken alone	T : theory or principle underlying the invention				
Y : particularly relevant if combined with another document of the same category	E : earlier patent document, but published on, or after the filing date				
A : technological background	D : document cited in the application				
O : non-written disclosure	L : document cited for other reasons				
P : intermediate document	& : member of the same patent family, corresponding document				

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 10 15 0148

5 This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
