(54) **Unit for repairing and inflating inflatable articles**

(57) A unit for repairing and inflating an inflatable article defines a volume (13) for a sealing fluid; a compressed-air inlet (9) connectable to a pressure source; an outlet (37) connected fluidically to the inlet (9) by the volume (13) to inject sealing fluid into the inflatable article by means of compressed air; and a pressure regulating unit (29) having an outlet node (33) upstream from the volume (13), a first air resistance (31) for reducing air pressure to the volume (13), a bypass line (43) connected to the outlet node (33) and parallel to the first air resistance (31), and a selector (30) connected to the first air resistance (31) and the bypass line (43).

FIG. 2
