(54) Punch nipper, in particular for metal section bars

(57) The punch nipper for section bars comprises a supporting arm (1), an operating arm (2) and a lever arm (3); the supporting arm (1) is a rectilinear element; on the distal end of the supporting arm (1) there is a support (4) which partially embraces the section bar; the operating arm (2) is a rectilinear element on the distal end of which there is an orthogonal element, onto which a point (2.1) directed at the support (4) is secured; the lever arm (3) is a rectilinear element to the distal end of which a cam-shaped body (3.1) is fixed; two pairs of brackets (6, 7) are fixed onto the supporting arm (1); the operating arm (2) is pivoted to the supporting arm (1) by means of a bolt (8) inserted into the first pair of brackets (6); the lever arm (3) is pivoted to the supporting arm (1) by means of a bolt (9) inserted into the second pair of brackets (7) and into the body (3.1).

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 10 42 5039

5

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
