(54) **A suspended ceiling and a method for supporting a suspended ceiling**

(57) The present invention relates to a suspended ceiling comprising a profile (1) and at least one tile made of compressed fibre material such as mineral wool. The profile (1) extends along a longitudinal direction and being adapted to extend along and to be fastened to a surface. The profile (1) comprises at least two attachment portions (10), each attachment portion (10) being adapted to receive a fastening means for fastening the profile

(1) to said surface. Each of said at least two attachments portions (10) is resilient in a direction being adapted to at least partly point towards said surface for accommodating to any irregularities of said surface. The profile (1) supports said at least one ceiling tile. The present invention further relates to a method for supporting a suspended ceiling.
