Remarks:

This application was filed on 10-03-2010 as a divisional application to the application mentioned under INID code 62.

(54) **Squirting toy**

(57) A squirting toy is comprised of a cylindrical housing and a piston that slides within to force water into or out of the housing via a hole therein. The housing is encased within a polyethylene closed cell foam shell. The

shell is non-absorbing, so that the foam remains buoyant and keeps the gun afloat indefinitely when left in water. The foam is soft, so that the gun is not a safety hazard when left floating in a swimming pool.

Fig. 1.
