(54) **Central drying group in plants for drying paints and/or other materials**

(57) A drying group in plants for drying paints and/or other materials, to be associated with a beam of a support scaffolding, said group comprising: drying means that comprise one or more side by side drying panels (6) to define a drying surface; and positioning and support means of said one or more panels (6), comprising at least sliding means (1) for sliding along a horizontal direction

(Y) corresponding to the beam development direction and lifting and lowering means (4) for lifting and lowering (4) the panels along a vertical direction (Z), wherein the lifting and lowering means (4) adapted to rotate as a whole, with respect to the sliding means (1), around an axis (Z) parallel to said vertical direction.
