(54) Modular device, reversible and polyvalent, of antipanic closure for mortise locks

(57) A reversible and multipurpose modular panic locking device for mortise locks, comprising a case (1) fastened to a door (2) by means of a base plate (3), a first-order lever (4) with a vertical axis of rotation (4a) in the case (1), and a cam (5) with a reciprocal topography of facing surfaces that belong to the base plate (3) and to a floor wall (1f) of the case (1), this cam (5) having its virtual axis of rotation in a hollow (5a) that is reciprocal

to the square shaft (6a) of a lock (6) mortised in the thickness of the door (2); this hollow is in a shaft journal (5c) that is reciprocal to the bearing (3a) of the base plate (3), the case (1) of which has a first vertical sidewall (1a) provided with a complementary window (1c) of the shaft hub (7b) of the connecting rod (7a) of a pushbar (7) of the panic locking mechanism installed across the width of the inner side of the door (2).

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 10 16 4977

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
