(54) Method for producing a panel holding cleat and the use of such cleat

(57) The present invention relates to a method for producing a first rail section (10) for a rail unit (1) or holding cleat for fitting of a part (2), such as a glass unit, in a through hole in a construction element (3), such as a door or window. The invention also relates to a rail section and to a structure comprising such a rail section.
