Remarks:

This application was filed on 30-11-2010 as a divisional application to the application mentioned under INID code 62.

(54) **Endoscope treatment instrument and treatment instrument apparatus for endoscope**

(57) An endoscopic treatment instrument (11) includes: a long tube body (12) to be inserted into a body cavity, including a flexible member; a first bending portion (14) provided to a distal end part of the tube body, for bending the tube body with respect to an axial direction;

a second bending portion (15) provided in a linked manner to a proximal end side of the first bending portion, for bending the tube body in the axial direction; and a bending operation portion for independently bending the first and second bending portions.

FIG.2
