(54) **Machinery for dedusting, washing and drying carpets**

(57) The integration of a single machine (10) for the operations of dedusting, washing and centrifuging carpets is the solution to current problems, which require a washing machine and another for centrifuging, shaking being carried out manually. This is avoided with the design of the machine described, which integrates a frame,

formed by side members (11,12) joined by longitudinal cross beams (35), a carpet shaking station (44) with the aim of dislodging the small particles of dirt in the carpet, a carpet washing station (13) with the corresponding brushes cleaners and means to supply liquids such as water and detergents, and subsequent collection, and a centrifuge station (46) for the carpet when clean.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 10 00 7354

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
