(54) **Reduced energy let through mode indication and delay in switching devices**

(57) A method of improved reduced energy let through (RELT) mode selection in a switching apparatus (200) includes receiving a request (307) to disable a RELT mode of the switching apparatus (200), and, if the RELT mode of the switching apparatus is active, increasing a current threshold of the switching apparatus (200) after a configurable amount of time (311) has elapsed from the receipt of the request to disable the RELT mode (313).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 10 17 5354

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
