(54) An angle bracket

(57) A radiator bracket includes an elongate rail which has first and second support means which support the radiator or its stirrups from beneath. A locking device protects against unintentional dismounting of the radiator at at least the first support means. The locking device is pivotally disposed in the rail about a pivot point and is movable between a locking position and a dismounting position. The pivot point is disposed below the adjacent support means.

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 10 00 6336

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
