(54) **Armor**

(57) The armor is designed for protection of targets against shaped charges equipped with piezoelectric fuses and fired by RPG launcher.
The armor comprises supporting components (1) on which there are fixed lamellae shaped as oval (2) and spiral (3) bodies. The spiral bodies (3) have holes cut. The peripheries of the oval (2) and spiral (3) bodies have sharpened edges.
The supporting components (1) can be two or more and are fixed at distance one behind the other which ensures destruction of the ammunition in wide range of obliquities.

The Hague	5 December 2012	Lahousse, Alexandre

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
