Light emitting device package

- (57)

Disclosed is a light emitting device package. The light emitting device package includes a package body, a light emitting device installed in a cavity of the package body, an encapsulation layer to seal the light emitting device, and an electrode connected to the light emitting deice. The package body includes a material having thermal conductivity lower than thermal conductivity of a material constituting the encapsulation layer.

FIG. 1

The present search report has been drawn up for all claims			
Place of search The Hague		Date of completion of the search 31 July 2014	Examiner van der Linden, J
CATEGORY OF CITED DOCUMENTS X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document			

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 10 19 2289

31-07-2014

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
