(54) **Electric radiator with tubular resistance**

(57) Object of the invention hereof is a heating element (1) for room heating comprising an emitter (11) capable of yielding heat to the room wherein is located and an electric resistance (2) of the type comprising an outer

tubular element (21) housed in a seat (111) of said emitter (11); the electric resistance is kept in operating position through interference coupling between said outer tubular element thereof (21) and said seat (111).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 10 01 5750

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
