(54) Mounting set for fixing a frame

(57) A mounting set 5 for securing a frame 1 to a setting frame 3 comprises two interacting mounting elements 7 and 9. A bent-over end of the first mounting element 7 forms a projecting lip 23.

The second mounting element 9 comprises a row of projections 35 positioned one behind the other. During the mounting activity the lip 23 of the first mounting ele-

ment 7 catches on one of the projections 35 of the second mounting element 9.

Before the frame 1 is secured to the setting frame 3, mounting elements are first attached while distributed over the periphery of the frame and the setting frame. Subsequently, the frame 1 can be simply clicked into the setting frame 3 as a result of which quick mounting is made possible.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 10 17 4915

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on. The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
