(54) **Panel for building construction**

(57) The present invention relates to an insulating construction panel 1 for the construction of a building, comprising a first face sheet 10 and a second face sheet 11, adapted to lend stability to the construction panel 1. The construction panel 1 further comprises an insulating core layer 12 arranged between the first 10 and the second 11 face sheet. The construction panel 1 also has a frame structure 13 fitted to the first face sheet 10, so that the first face sheet 10 is placed between the frame structure 13 and the core layer 12. At least one of the first and the second face sheet consists of a fireproof material.
