(71) Applicant: **Sistemas Valle Léniz, S.L.U.**
20550 Aretxabaleta (ES)

(54) **Anti-panic lock adapted to doors**

(57) Anti-panic lock adapted to doors that comprises at least one lever (6) operable by a cylinder, a latch (7) operable by a first handle or by a second handle, means for transmitting the movement of the cylinder or the corresponding handle towards the latch (7) or the lever (6), the transmission means (100) comprising a first pusher (20) rotatable when operated by the first handle, a second pusher (21) rotatable when operated by the second handle, and at least one slide member (110) that moves when operated by any of the pushers (20,21), and anti-panic release means (70) that, when operated by the handles, act on the transmission means (100) releasing the lever (6). The release means (70) project out from one of the surfaces (30a,60a) of the slide member (110), thus only the pusher (20,21) that is arranged facing said surface (30a,60a) operates the anti-panic release means (90).
