(54) **Air conditioning device**

(57) The invention relates to an air conditioning device. The air conditioning device includes a casing (1) with at least one vertical gap (2). An air curtain is produced with the air conditioning device in connection with the opening of an entrance door by blowing air from the

gap (2). The direction of air flow coming from the gap (2) is controlled by an actuator (9). The actuator (9) is arranged to control the direction of the air flow coming from the gap (2) differently at the lower part than at the upper part.
