(54) **Toilet**

(57) The toilet comprises a bowl (1) with an upper rim (2) and a water tank (3), so that the water in said tank (3) can be flushed to said bowl (1) through said upper rim (2), and it is characterised in that said water tank (3) is placed around the external surface of said bowl (1), under the height defined by the upper rim (2) of said bowl

(1). Said water tank (3) has advantageously a shape complementary to the external surface of said bowl (1).

It permits to use a conventional toilet in shape and compact dimensions and the tank is placed in a way that during the normal use of the toilet is not seen. It permits to save space.
