(54) **Hand-held game apparatus and housing part of the same**

(57) A game apparatus (1) has an upper housing (5) and a lower housing (2) which are foldable. A first part, a second part, and a third part constitute the upper housing (5). A fourth part, a fifth part, and a sixth part constitute the lower housing (2). By assembling the parts, the game apparatus (1) comes to have a three-layered structure when folded, thereby enhancing operability, a degree of freedom of design, and the like.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 11 15 5148

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
