(54) **Guide for sliding glove box of a vehicle's dashboard**

(57) Guide of a sliding glove box of a vehicle's dashboard comprising a first part (21) being connected to a glove box (1) and a second part (21') being connected to a dashboard (1) wherein the glove box is housed (1), said first part (21) being slidably connected to said second part (21') according to an axial development direction

(r) of the guide. Said first part (21) and said second part (21') are realized by means of respectively a first segment and a second segment of the same section bar.

Said first (21) and second part (21') are kept together by being assembled with a glove box and with a compartment (31) of the glove box (1).
