(54) Road side protective structures

(57) The invention relates to improvements in road side protective structures of the type comprising an upper rail (1) attached on support posts (3) and a lower screen (4) closing the gap to the ground, the lower screen (4) being attached on the upper rail (1) by means of arms (5) comprising a rigid profile section (6) attached at one

end directly on the upper rail (1), whereas the other end is attached on the lower screen (4) by means of a J-shaped part (7); where parts (10) made of bent sheet are arranged between the lower screen (4) and the support posts (3).

The present search report has been drawn up for all claims			
Place of search		Date of completion of the search	Examiner
The Hague		17 November 2014	Tran, Kim Lien
CATEGORY OF CITED DOCUMENTS X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document			

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 11 17 0808

5

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
