(72) Inventor: **The designation of the inventor has not yet been filed**

(54) **Boxes-carrying bag**

(57) The *boxes-carrying bag* is an invention that will allow carrying by hands large and weighty merchandise that does not fit traditional bags. The most important and

innovative feature of this product are the movable sides. Once sides are moved, the bag can accommodate boxes of any size, which can be then comfortably carried by the handles on the top of the bag.

**EP 2 430 944 A1**

**Description**

**[0001]** Until the boxes-carrying bag was invented, there was no packaging allowing customers to carry large boxes comfortably and fashionably. Retailers did not provide other packaging than the traditional bag and customers were forced to carry in their arms large-size boxes that did not fit. 5

**[0002]** This invention has been designed with the objective to provide a safer, more comfortable and stylish mean to carry large and weighty boxes that would not fit traditional bags, therefore allowing retailers to offer a better service to their customers. 10

**[0003]** The boxes-carrying bag can be produced in different designs, including: bag with no sides (Fig.1) and (Fig. 4); bag with movable sides (Fig. 2), and bag with removable sides (Fig. 3). The latter two are specifically envisaged to carry large-size and weighty boxes and merchandise. Once sides are removed or opened, the bag can fit a large box, which is basically wrapped (Fig. 7) and comfortably carried by using the handles on the top of the bag.(Fig. 7), (Fig. 8) and (Fig. 9). 15 20

**[0004]** If needed, the bag can be fastened by using clips (h) or belts (g).

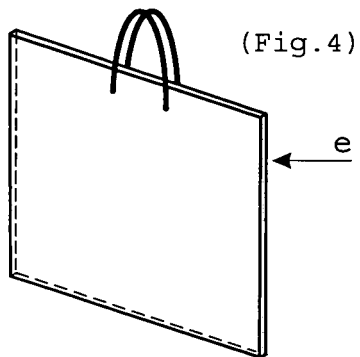

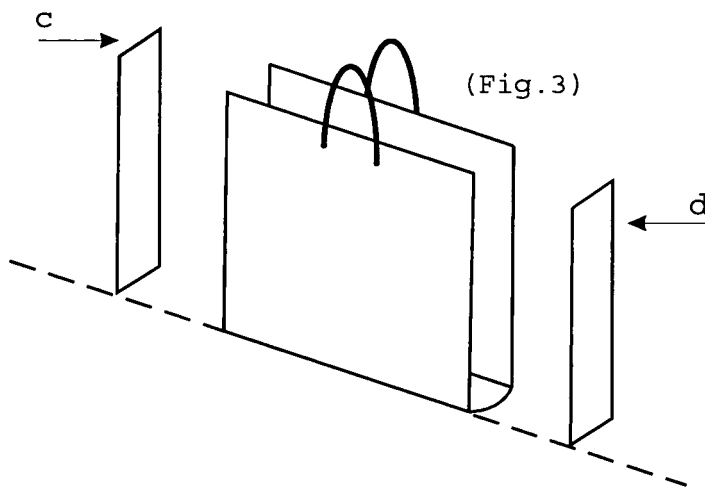

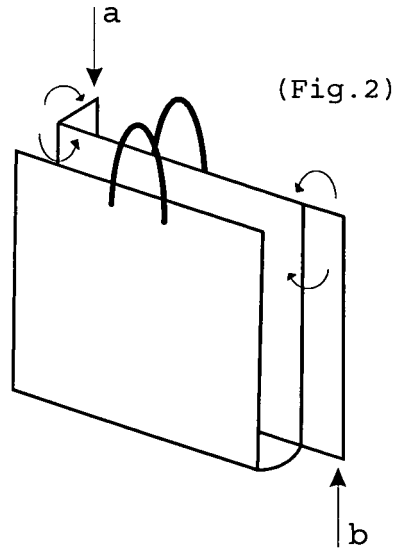

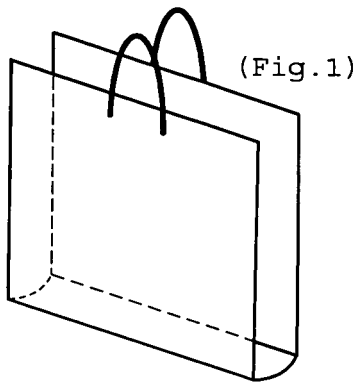

**[0005]** The design also allows tying together two bags to fit extra-large boxes (Fig. 6). As result, it is possible to comfortably carry by hands large objects such as paintings, mirrors, lamps, large screen TVs, pc, monitors, microwaves, iron boards, small furniture. Once sides are fastened, the bag can be utilized as an ordinary bag to carry small size merchandise. 25 30

**[0006]** The material used to produce the boxes-carrying bag makes it fungible across many sectors, including retail business, industry, fashion, agriculture and construction. Bags can be made to order in different colors and designs. 35

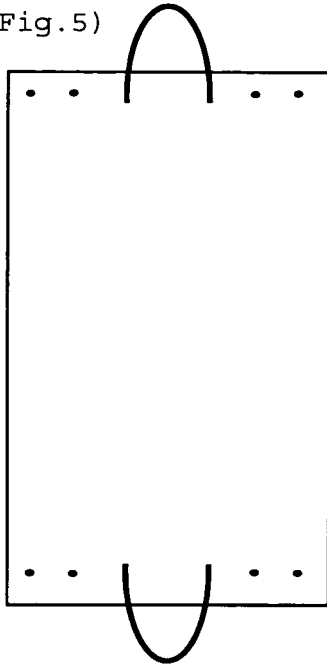

**Claims**

1. Boxes-carrying bag with removable sides (c),(d); 40
2. Boxes-carrying bag with movable sides (a),(b);
3. Boxes-carrying bag with no sides (Fig. 1),(Fig. 4); 45
4. Boxes-carrying bag according to claim 3 with clips to eventually add sides;
5. Boxes-carrying bag according to any of the preceding claims with belts to fasten the bag (g),(h); 50
6. Boxes-carrying bag according to any of the preceding claims with clips to tie two bags together (f); 55
7. Boxes-carrying bag according to any of the preceding claims with sides fastened by zip;

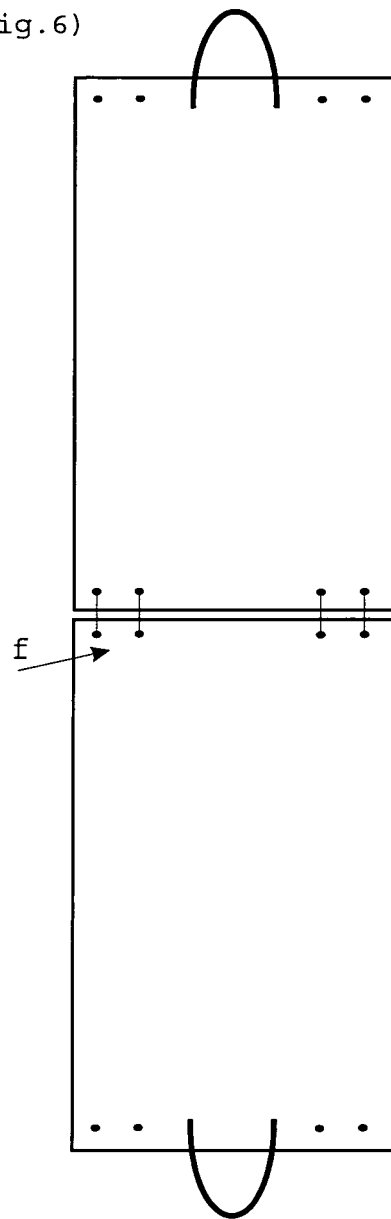

8. Boxes-carrying bag according to any of the preceding claims with zip fastening without sides (e).
