(54) **A closing insert for a handheld urinal for avoiding odour leaks**

(57) The invention relates to a closing insert (301) to be used with a funnel (201) of a urinal bottle (101). The funnel comprises an opening (208) which enables passage of urine to the urinal bottle. However, the opening of the funnel has the disadvantage that urine odour are able to escape via the funnel's opening. After use of the urinal, the closing insert is positioned so that it closes the funnel's opening. The closing insert has a funnel shape-line shape and is dimensioned to be inserted into the funnel. Since the closing insert has a receiving opening similar to the receiving opening of the funnel the closing insert does not change the use of the funnel and the urinal bottle, except that the user has to operate the closing insert to open it before use.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 11 18 3664

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
