(54) **A cooker with a movable gas tap shaft**

(57) The present invention relates to a cooker (1) with a gas tap comprising a flow control member (30) which is rotated by means of a shaft (10) which is movable along an axial advancing direction (D1) and where the shaft (10) partially enters from an internal end thereof (12) into a housing (21) of the flow control member (30); a rod (20)

which is placed inside the flow control member (30), which is configured so as to be able to rest onto an internal end (12) from a first end thereof (23) and which carries a flow control piece (28) from the opposite second end (25).
