(54) **Spinning method by using air spinning device and air spinning device**

(57) A spinning method for producing a spun yarn (Y) from a fiber bundle (F) by using an air spinning device (6) is proposed. The air spinning device (6) includes a spinning chamber (SC) in which fibers are swung, a fiber guide (61) in which a fiber introducing passage (61g) communicating with the spinning chamber (SC) is defined, and a spindle (62) in which a fiber passageway (62s) for passage of the fibers swung in the spinning chamber (SC) is defined. In the air spinning device (6) the spindle (62) and the fiber guide (61) are separated by a predetermined distance selected dependent on an average fiber length of the fiber bundle (F).

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 11 18 8308

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
