(54) **Container for collecting the condensed water in a clothes dryer and clothes dryer thereof**

(57) The present invention relates to a container (10) for collecting condensed water in a clothes dryer (1), in particular of the condensation type, said container (10) being removably associated with a housing (A) in a frame (2) of the clothes dryer (1).

The invention is characterized in that the container (10) comprises:

- a first aperture (11) for supplying condensed water into the container (10) and for quickly draining the condensed water from the container (10);
- a second aperture (12) for a precision drainage of the condensed water from said container (10).
