(54) **A cooling device with a cover in the liner**

(57) The present invention relates to a cooling device (10) comprising at least one fixation member (40) which is assembled inside the liner (11) of the cooling device (10) and which has a pin; and a cover (20) which is connected to the fixation member (40) through a connection part (21) which is in connection with said pin, **character-**

ized in that, it comprises at least one cut-out (31) embodied on said connection part (21), at least one fixation piece (32) connected to the cover (20) so as to cover said cut-out (31) at least partially so as to define a pin housing where the pin is restrained
