(54) **A radiator bracket**

(57) The disclosure relates to a radiator bracket (1) for suspending a radiator (8) on a wall. The radiator bracket (1) comprises a rail (2) with a first and second engagement means (6, 7) for cooperation with respective portions of the radiator (8) or fixing devices (9, 10) disposed thereon. At least the first engagement means (6) has a locking device (3). The locking device (3) has a stand-by position and a locking position, where the locking device (3) is pretensioned towards the locking position by spring means (4). The locking device (3) is rotatably and displaceably connected to the rail (2) so that the locking device (3) is moveable in one plane between the stand-by position and the locking position.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 00 1506

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
