(54) **Energy display device, method and computer program**

(57) A display device includes: an image display section which displays an image on a screen on the basis of an image signal; and an execution section which executes an application which is acquired from a network on the basis of a user's instruction. When the image dis-

play section displays an image, the application which is executed by the execution section acquires, through the network, information related to energy that is used in a predetermined range, and displays the information on the screen.
