(54) Refrigerator

(57) To provide a refrigerator which maintains heat dissipation by preventing peeling of a heat reflective material when the heat reflective material is attached to a back panel constituting a back face of the refrigerator. It is possible to prevent peeling of a first heat reflective material by assembling such that an end face of the first heat reflective material is held between the flanges and the back panel by lapping flanges of left and right side panels of the refrigerator and the back panel to which the first heat reflective material is attached.

FIG. 1

EUROPEAN SEARCH REPORT

CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document			
T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document			

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 15 7410

5 This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
