(54) **A protective and disposable intervention envelope shaped tent**

(57) A protective and disposable intervention envelope shaped tent (3), in particular for intervention on contaminated objects, said tent being leak tight and comprising at least a first (20) flexible flat sheet and a second (21) flexible flat sheet, said tent further comprises at least one first mechanically resistant and re-usable closure member (22) having a first and a second part (23), said first part being attached to said first sheet and said second part (24) being attached to said second sheet, said first closure member being provided to attach and detach said first (20) and second (21) flexible sheet to each other, said tent further comprising at least one second leak tight and re-usable closure member (25,26) comprising a first flap (25) connected in a leak tight manner to said first sheet (20) and a second flap (26) connected in a leak tight manner to said second sheet (21), said first and second flap being provided to be leak-tightly attached to each other by a leak tight seal and being applied in such a manner that said first and second closure members extend substantially parallel to each other and so as to overlap said first mechanical closure member when said first and second flaps and sheets are attached to each other.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 16 4839

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
