(54) **Radio broadcast receiver and radio broadcast receiving method linking RDS and DAB**

(57) A controller (7) sets a radio broadcast receiver to a regional on mode. A DAB receiving unit (5) receives a DAB broadcast. The controller (7) controls an RDS receiving unit (2) so that, if service linking information includes the linkage information indicating a PI code of an

RDS broadcast which is the same as the DAB broadcast, the RDS receiving unit (2) ignores a regional code of the PI code indicated by the linkage information and searches for a broadcast having a PI code matching the PI code indicated by the linkage information other than the regional code.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 00 2939

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
