(54) **Printing method, transfer material, and inkjet discharge device**

(57) A printing method according to the invention includes forming an adhesion layer (7) using a printing whereby adhesive is ink-jetted, in a pattern intended to be transferred, onto a transfer layer (6) of a transfer material (3) in which the transfer layer (6) is provided on a base material (4), or onto a transferring medium (2); stacking and pressing so that the adhesion layer (7) is sandwiched by the transfer material (3) and transferring medium (2); and transferring the transfer layer (6) to the transferring medium (2) in the pattern intended to be transferred, wherein when forming the adhesion layer (7), the jetting amount of the adhesive is switched between at least two or more stages.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 17 1601

5

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
