(54) **Apparatus and method for performing picture capture in a portable terminal**

(57) An apparatus and method for specifying a capture region, performing a picture capture for a specific region (partial region) on an output picture, and verifying contents of capture data copied to a clipboard. The apparatus includes a capture window setting unit configured

to output a capture window specifying a region to be captured, and change a setting of the capture window. The apparatus also includes a data processing unit configured to acquire capture data for a region corresponding to the capture window when the setting of the capture window is completed.
