(54) **Personal armband storage device**

(57) A personal armband storage device (10) includes a body portion (14) having an opening for access to a storage compartment, a back plate (60) attached to the body portion (14), the back plate (60) including a plurality of layers of material arranged to mirror the musculature of a human upper arm in the region where the

deltoid muscle, the triceps muscle, and the bicep muscle meet; and a V-shaped strap (12) attached to the back plate (60) for securing the body portion (14) to a user. The personal armband storage device (10) is resistant to slippage during physical activity due to increased friction between the back plate (60) and the upper arm.
