(54) **Blade holder for road maintenance plough**

(57) The invention is related to plough blade holder of a road maintenance vehicle, wherein the blade holder is made of an elastically deforming material. With this blade holder, the blade is enabled to follow unevenness

of the processed surface. The blade holder of the invention comprises a part made of an elastically deforming material, which has one or several hollow spaces, such that the blade holder operates similar to a paralelogram.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 18 7848

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
