(54) Light emitting diode device

(57) Disclosed are a light emitting diode device (100) and a lighting apparatus (1500) incorporating the same. The light emitting diode device (100) includes a plurality of lead frames (121, 131), a first body (141) having reflectance, disposed on top surfaces of the lead frames and having an open region at a predetermined region of the top surfaces of the lead frames, a second body (151)

having transmittance, having a first opening (150) corresponding to the open region of the first body, and disposed on a top surface of the first body, a light emitting diode chip (161) on at least one of the lead frames exposed in the first opening of the second body, and a first resin layer (171) disposed in the first opening of the second body to cover the light emitting diode chip (161).

FIG. 2

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 12 19 2726

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
