(54) **Board fixture**

(57) A board fixture (1, 9, 11, 14, 17, 29) for flush joining of a first building board (19) and a second building board (24), said board fixture (1, 9, 11, 14, 17, 29) comprising a first, front flange portion (2), a second, rear flange portion (3), and a web portion (4) connecting the flange portions (2, 3), wherein the flange portions (2, 3) and the web portion (4) form a first open space (5) for receiving an edge portion (20) of the first building board (19) and a second open space (6) for receiving an edge portion (25) of the second building board (24). The web portion (4) exhibits a plurality of through openings (7, 15) for allowing an adhesion agent (22) to spread between the first open space (5) and the second open space (6) for the formation of an adhesion joint (26) between the edge portions (20, 25) of the building boards (19, 24). The rear flange portion (3) exhibits openings (10) for allowing the adhesion agent (22) to form an adhesion joint between the board fixture (9) and an underlying structure. Also a method for joining building boards is disclosed.
