(54) **Ratchet wrench and body used in ratchet wrench**

(57) A ratchet wrench comprises a body (10), a ratchet (40), a first pawl (60), and a second pawl (80). Each of the first pawl and the second pawl can move between a first position and a second position relative to the ratchet. The first position is a position where the ratchet wrench can transmit torque to said driven element from respective first pawl or second pawl, and the second position is a position where no torque is transmitted from respective

first pawl or second pawl. A control member (100) can pivot or rotate to stay in one of a first position, a second position, and a neutral position for different operations. The body has an operating part (14) comprising a groove (16). The groove comprises two accommodation chambers having inclined surfaces and can accommodate the first pawl and the second pawl.

The present search report has been drawn up for all claims			
Place of search Munich		Date of completion of the search 21 July 2014	Examiner Kühn, Thomas
CATEGORY OF CITED DOCUMENTS X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document		T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document	

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 12 19 9697

5

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
