(54) **Concrete casting mold system**

(57) The invention relates to a concrete casting mold system including a base plate (1), a number of edge plates (2) that are perpendicular to the base plate and delimit the mold being cast on the base plate and a number of support members (3) being fastened on the base plate and supported to the edge plates outside the mold to be cast for supporting the edge plates and holding them in place for the duration of the casting and curing thereof. According to the invention, the concrete casting mold system includes an angular support (4) constituting

a rigid body in connection with each support member (3), with a fastening part (5) that is perpendicular to the base plate (1) and fastened to the outer surface of the edge plate (2) in the direction thereof and a support part (6) that is perpendicular to the base plate and to fastening part and supported by the lower edge on the base plate. In addition, the lower part of the angular support includes a support shoulder (7) to which the support member can be supported.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 13 16 0300

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
