(54) **Liquid sprayer**

(57) A liquid sprayer (1) comprising a spray liquid storage unit (5) and a main body for supporting the spray liquid storage unit inside itself. The spray liquid storage unit includes a core (34) for soaking up spray liquid stored in a storage tank to an outside of the storage tank. The main body includes a lid member (2) to be put on a support member (3) for supporting the spray liquid storage unit so that the lid member can be opened and closed. A spray hole (8) is formed in a position of the lid member facing a front face of the core of the spray liquid storage unit supported by the support member when the lid member is closed onto the support member, a transducer (44) facing the spray hole is disposed inside the lid member, and the transducer disposed inside the lid member is in close contact with and pressed against the front face of the core of the spray liquid storage unit supported by the support member when the lid member is closed onto the support member.
