(54) **Fold and play greeting card**

(57) A two dimensional message delivery system is convertible into a three dimensional object. A die cut greeting card with sections of the greeting card die cut but still partially connected and creased so that they can be removed by the application of force from the card without the need for scissors or other cutting tools and which can be assembled by folding and engaging the die cut sections without the need for tape, glue or other connectors into a three dimensional object. It includes a die cut

main two dimensional structural element, at least one die cut auxiliary two dimensional structural element, which connects with the main two dimensional structural element to form a three dimensional object, and a die cut additional message delivery element, which connects with the main two dimensional structural element to provide a messaging element to the three dimensional object.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 13 17 1056

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
